

Commendations

Projects that make a significant contribution to the quality and appearance of the built environment. Commendation level schemes demonstrate a good standard of architecture or design, sustainability, inclusive design and provide a positive social, cultural, environmental or economic benefit to the local community.

Angel Field

Liverpool, North West

BCA LANDSCAPE, DAN KENYON

This robust landscaping scheme packs a lot into a very small space, providing both public and intimate spaces with delicate and subtle detailing. It enhances the setting of the listed buildings that surround it and provides well used, accessible space with areas for learning and contemplation as well as social gatherings. The design has responded to both a highly sensitive historic environment and an area of social, economic and physical deprivation within which Liverpool City Council regeneration policy is encouraging investment.

Barking Central

Barking, Greater London

TIM SCAR, ROB PARRISH

Barking Central is a large mixed-use scheme of seven new buildings including a new Learning Centre, residential apartments, a hotel, retail units, a café, a new town square and an Arboretum. It has provided an increased sense of identity to the centre of Barking with its well used, vibrant and multi functional space having had a positive impact upon the local area, breathing new life into the town centre. Local residents and users were extensively involved in the design and construction of the public space, art and street furniture.

Bateman's Row

Shoreditch, Greater London

NICK KANE

Bateman's Row is a stunning addition to the city, comprising three floors of commercial space and four residential units. With well considered material choices on the outside of the building, in keeping with its surroundings, the interior has a highly urban, inner city feel. An exceptionally well thought out building which contributes both to the streetscape as a catalyst for further regeneration and through public access to the art gallery and retail space. The mixed use creates a vibrant 24 hour usage for the building.
